University | August 2024
Certificate No. 0124-002360

Applied Microsoft Office

Trust Training Partners | Universitas Amikom
Purwokerto | September 2024
Certificate No. 24ML00590

Languages

Indonesian (Native) • English
(Professional Working Proficiency)

EXECUTIVE SUMMARY

I am an Informatics graduate from Universitas Amikom Purwokerto with an interest in web application development. As a Full-Stack Web Developer, I am accustomed to learning and applying various frontend and backend technologies to build web applications. I pay close attention to code structure, system stability, maintainability, and application performance. I am familiar with exploring various aspects of application development, from user interfaces, APIs, and authentication to databases and backend systems. I am also eager to continuously learn new technologies and approaches to building effective and user-friendly digital solutions.

EXPERIENCE

Lead Full Stack Developer (Riset & Implementasi Sistem)

2026 - April - Juni

Pondok Pesantren Riyadussalikin

- Architected and deployed production-ready web applications using Next.js 16, TypeScript, Tailwind CSS, and PostgreSQL.
- Implemented secure authentication, role-based access control (RBAC), and automated invoice tracking workflows.
- Optimized frontend rendering and delivery, achieving 99+ Lighthouse Performance scores and sub-second page load times.

Full-Stack Web Developer

2025 - Oktober

DEMA Poltekkes Kemenkes Semarang

- Designed and developed a web-based voting platform for the HIMA Governor election at Poltekkes Kemenkes Semarang.
- Implemented digital voting workflows including user authentication, candidate selection, and vote submission.
- Focused on vote integrity and preventing duplicate submissions while providing a simple and accessible voting experience.

KEY PROJECTS

Pondok Pesantren Riyadussalikin & SPMB Online Platform

Lead Developer & Full-Stack Architect

Designed and deployed a high-scale modern Islamic boarding school (pesantren) digital platform using Laravel 11, Vue.js 3, Inertia.js, and Filament PHP v3, featuring an automated New Student Admission (PPDB) system and WhatsApp API integration for real-time notifications, successfully cutting manual administrative workload and significantly boosting system responsiveness.

Tech: Laravel 11, Vue.js 3, Inertia.js, Filament PHP v3
